PROJECTS

Mythos CRM — Full Stack Web Application

React • Node.js • Express • REST APIs

- Developing a CRM platform featuring dashboard analytics, onboarding workflows, trip management, and responsive UI components
- Integrating frontend forms with backend APIs to replace mock data with live application workflows
- Managing development workflow using GitHub Issues, milestones, Agile sprint planning, and version control

T Beauty Lounge — Medical Spa Website

React • Tailwind CSS • UI/UX Design

- Led a full redesign focused on responsive layouts, modern UI, and brand consistency
- Built interactive components to improve service discovery and customer engagement
- Optimized frontend experience for both desktop and mobile users

Tomo Japanese Cuisine — Restaurant Website

React • Responsive Design

- Designed and developed a responsive restaurant website focused on menu presentation and user experience
- Currently redesigning the visual layout and UX flow for a more modern digital experience
- Structured scalable menu data and category systems for easier maintenance
